

Long-distance Capacitive Proximity Sensor

E2K-C

Capacitive Proximity Sensor with Adjustable Sensitivity

- Detects both metallic and non-metallic objects (glass, lumber, water, oil, plastic, etc.) without direct contact.
- DC models acquire CE marking

Ordering Information

Sensors

Rating/Performance

| Item | Model | E2K-C25M□1 | E2K-C25M□2 |
|--|--------------------|--|------------|
| Sensing distance * | | 25 mm | |
| Sensing distance adjustable range | | 3 to 25 mm | |
| Sensing object | | Conductors and dielectrics | |
| Standard sensing object | | with grounded metal: 50 x 50 x 1t mm | |
| Differential distance | | 15% max. of sensing distance (when adjusted to 25 mm ±10% with standard object) | |
| Response frequency | | 70 Hz | |
| Power supply(Operating voltage range) | | 12 to 24 VDC, ripple (p-p): 10% max.,(10 to 40 VDC) | |
| Current consumption | | E models: 10 mA max. at 12 VDC, 16 mA max. at 24 VDC | |
| Leakage current | | Y models: 1 mA max. at 100 VAC (50/60 Hz) with output turned OFF., 2 mA max. at 200 VAC (50/60 Hz) with output turned OFF. | |
| Control output | Switching capacity | 200 mA max. | |
| | Residual voltage | 2 V max. (under load current of 200 mA with cable length of 2 m) | |
| Indicator lamp | | Detection indicator (red LED) | |
| Operating status (with sensing object approaching) | | E1, Y1 models: NO E2, Y2 models: NC | |
| Protective circuits | | Reverse connection protection, surge absorber | |
| Ambient temperature | | Operating/Storage: -25°C to 70°C (with no icing or condensation) | |
| Ambient humidity | | Operating/Storage: 35% to 95%RH (with no condensation) | |
| Temperature influence | | ±15%max. of sensing distance at 23° within temperature range -10°C to 55°C | |
| Voltage influence | | ±2% max. of sensing distance at a voltage between 85% and 115% of the rated power supply voltage | |
| Insulation resistance | | 50 M min. (at 500 VDC) between current carry parts and case | |
| Dielectric strength | | 1000 VAC 50/60 Hz for 1 min between energized part and case | |
| Vibration resistance | | 10 to 55 Hz, 1.5 mm double amplitude for 2 hours each in X, Y, and Z directions | |
| Shock resistance | | Destruction: 500 m/s ² for 10 times each in X, Y, and Z directions | |
| Protective structure | | IEC 60529 IP66 | |
| Connection method | | Pre-wired models (standard length: 2 m) | |
| Weight (Packed state) | | Approx. 200 g | |
| Material | Case | Heat-resistant ABS resin | |
| | Sensing surface | | |
| Accessories | | Mounting bracket, instruction manual | |

* The set distances are sensing distances applicable to standard sensing objects. Refer to Engineering Data for sensing distances applicable to other types of objects.

Operation

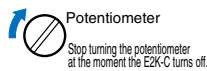

Sensitivity adjustment

Remove the rear rubber cap of the E2K-C and turn the potentiometer in the hole to adjust the sensitivity of the E2K-C.

The sensing distance increases by turning the potentiometer clockwise and decreases by turning the potentiometer counterclockwise. The potentiometer can make 15 ± 3 valid turns and then make slip turns because the potentiometer does not have a stopper. The slip turns will not, however, damage the potentiometer.

1. Slowly turn the potentiometer clockwise until the E2K-C turns on with no sensing object.

2. Turn the potentiometer counterclockwise until the E2K-C turns off with the sensing object located within the sensing distance.

3. The E2K-C will be in stable operation if there is a difference of 1.5 turns or more between the points the E2K-C is turned on and off, otherwise the E2K-C will not be in stable operation.

4. Set the potentiometer midway between the two points.

5. If the distance of each sensing object varies, take step 2 with the sensing object located at the farthest sensing distance to be applied.

Precautions

Correct Use

Design

Effects of Surrounding Metal

During Proximity Sensor installation provide a distance of 80 mm min. from the surrounding metal objects to prevent the Sensor from being affected by metal objects other than the sensing object.

If installing the Sensor with the L-shaped mounting bracket, provide a distance of 20 mm min. between the face of the sensing head and the mounting bracket.

Mutual Interference

Space the two Sensors at a distance exceeding 100 mm to prevent mutual interference.

Face-to-face Mounting

Parallel Mounting

Effect of High-frequency Electro-magnetic Field

The E2K-C may malfunction if there is an ultrasonic washer, high-frequency generator, transceiver, or inverter nearby.

Sensing Object

- Sensing Object Material. The E2K-C can detect almost any type of object. The sensing distance of the E2K-C, however, will vary with the electrical characteristics of the object, such as the conductance and inductance of the object, and the water content and capacity of the object. The maximum sensing distance of E2K-C will be available if the object is made of grounded metal.
- Indirect Detection. In the case of the detection of objects in metal containers, each metal container must have a non-metallic window.

Miscellaneous

Organic Solvents

E2K-C has a case made of heat-resistant ABS resin. Be sure that the case is free from organic solvents or solutions containing organic solvents.
