

SMART PLATFORM

One software – One connection – One minute

Omron's Smart Platform is designed to make machine automation easy. It provides seamless, drag-and-drop integration of all automation components in your machine. From sensor to controller, from HMI to drive, all devices are accessible through one connection using a single software suite, CX-One. Built-in distributed intelligence in Omron devices means less time programming and troubleshooting.

Every one claims ease of use, a short movie explains how easy programming and configuration can be:

SMART, SEAMLESS AND SLICEABLE

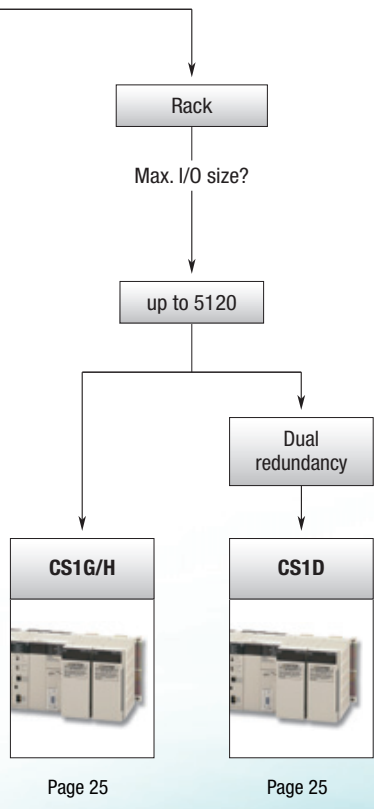

CJ1 – The ultimate in machine scalability

CJ1 series PLC gives you the competitive edge on flexibility, efficiency and speed.

From powerful CPU models that offer total machine control, to very small CPUs that enable to “scale” your machine into logical sections, it allows you to configure the “just-right” combination for your application.

- One scalable PLC family to match exactly with your application
- Transparent communication routing through different networks
- The best size/performance ratio in the industry

Compact and economical

Setting a standard for micro PLCs, the CPM1A packs all basic functions into a compact size. Four CPU sizes are available, each with a choice of AC or DC power, relay or transistor outputs. Select any combination of power supply, output, and the number of I/O points to meet your needs.

- Ultra compact
- Wide range of models; AC/DC, 10-40 I/O, relay/sink/source outputs
- Pulse I/O functions built in
- Easy connection to HMI terminal
- Digital, analog, and fieldbus expansion units

The universal small machine controller

Every CPM2A CPU comes equipped with an RS-232C interface as standard, e.g. to provide easy connection to a Programmable Terminal for fast and easy machine monitoring, setpoint adjustment, etc. Simple positioning with the pulse I/O function is another example of the many advanced functions and high added value that the CPM2A brings to compact machines. Removable terminal blocks ensure easy maintenance, and the CPM2A uses the same expansion I/O Units as the CPM1A for easy and economical sharing of system components.

- Real-time clock function
- 20-60 digital I/O with removable terminal blocks
- 20 kHz counter input, two 10 kHz pulse outputs integrated
- Two communication ports built-in, freely accessible
- Digital, analog, and fieldbus expansion units

Expand the capacity of your compact PLC

A wide variety of expansion units such as Digital I/O, Analog I/O and Remote I/O are available to create the control system you need for your application. These CPM1A expansion units can be used for CPM1A and also for CPM2A and CP1H PLC series.

Ordering information

The versatile slim-line controller

An extensive range of models ensures efficient machine control in an ultra-compact package. CPU Units are available with relay or transistor output, terminal block or various connector options, and an optional real-time clock function. Select the output type, number of I/O points and other specifications to meet your needs. Expansion I/O Units with 8 to 32 I/O points make it possible to configure a control system with a maximum of 192 I/O points.

- Space-saving slim outline, high-density I/O
- 10-32 I/O points per CPU, transistor or relay outputs
- 20 kHz counter input, two 10 kHz pulse outputs integrated
- Two communication ports built-in, freely accessible
- Digital, analog, and fieldbus expansion units

The All-in-One PLC

Designed for compact machines, it combines the compactness of a micro-PLC and the power of a modular PLC. Four built-in high-speed counters and four pulse outputs are ideal for multi-axis positioning control. The CP1H-XA comes with 4 analog inputs and 2 analog outputs built-in. This makes it suitable for simple loop control, using the PLC's advanced PID control function with auto-tuning. The CP1H can be expanded with CPM1 I/Os and supports up to 2 CJ1 special I/O units. This means that it is open to popular fieldbuses and supports all communication units of the CJ1 series.

- Up to 1 MHz for inputs/outputs
- CJ1M-compatible instruction set and execution speed
- 4 analog inputs and 2 analog outputs for the XA model
- USB port for easy communication, programming and configuration
- Supports PROFIBUS, DeviceNet, CAN and Ethernet

*1 CP1H CPU series can be expanded with CPM1A expansion units and CJ1 Special I/O units.

CP1H option modules

Type	Remarks	Order code
RS-232C option board	Plug-in board (D-Sub, 9 pins, female)	CP1W-CIF01
RS-422A/485 option board	Plug-in board (Terminal block)	CP1W-CIF11
Memory cassette	512 kWords (upload/download program)	CP1W-ME05M
Expansion I/O connecting cable	80 cm cable to connect CPM1A I/O	CP1W-CN811
CJ1 expansion unit adapter	Unit to connect CJ1 Special I/O units	CP1W-EXT01

Fast and powerful CPUs for any task

The family of CJ1 CPUs range from very small CPUs for simple sequence control to powerful and fast models that offer total machine control which can handle up to 2560 I/O points. This enables you to modularize or 'slice' your machine into logical sections without changing PLC series.

All CPU Units support IEC61131-3 Structured text and ladder language. Omron's extensive function block library helps to reduce your programming effort, while you can create your own function blocks to suit your specific needs.

Description	Remarks	Order code
CompactFlash memory card, 30 MB, for all models (not required for operation)	Industrial grade	HMC-EF372
CompactFlash memory card, 128 MB, for all models (not required for operation)	Industrial grade	HMC-EF183
CompactFlash PC-Card adapter	—	HMC-AP001
I/O terminal block (40×M3 screw) for CJ1M-CPU2x	MIL (40 pt)	XW2D-40G6
Servo unit terminal block for 1 axis	—	XW2B-20J6-8A
Servo unit terminal block for 2 axes	—	XW2B-40J6-9A
Connection cable between I/O terminal block and CJ1M-CPU2x (___ = length in cm)	MIL (40 pt)	XW2Z-___K
SMARTSTEP cable for CJ1M CPU2x, cable length: 1 m	—	XW2Z-100J-A26
W-series servo cable for CJ1M CPU2x, cable length: 1 m	—	XW2Z-100J-A27
CX-One, integrated software for programming and configuration of all Omron control system components	—	CX-ONE-AL__C-E
Connection cable, D-Sub 9-pin PC serial port to PLC peripheral port (length: 2.0 m)	—	CS1W-CN226
Connection cable, D-Sub 9-pin PC serial port to PLC peripheral port (length: 6.0 m)	—	CS1W-CN626
USB to serial conversion cable	—	CS1W-CIF31

Note: MIL = connector according to MIL-C-83503 (compatible with DIN 41651/IEC 60603-1).

Power and flexibility

CJ1 systems can operate on 24 VDC power supply, or on 100 to 240 VAC mains. For small-scale systems with mainly digital I/O a low-cost small-capacity power supply can be used. For systems with many analog I/Os and control/communication units, it may be necessary to use a larger power supply Unit.

Depending on the CPU type, up to 3 expansions can be connected to the CPU 'rack', giving a total capacity of 40 I/O units. The total length of the expansion cables of one system may be up to 12 m.

8 to 64 points per unit – input, output or mixed

Digital I/O units serve as the PLC's interface to achieve fast, reliable sequence control. A full range of units, from high-speed DC inputs to relay outputs, let you adapt CJ1 to your needs.

CJ1 units are available with various I/O densities and connection technologies. Up to 16 I/O points can be wired to units with detachable M3 screw terminals or screwless clamp terminals. High-density 32- and 64- point I/O units are equipped with standard 40-pin 'flatcable'-connectors. Prefabricated cables and wiring terminals are available for easy interfacing to high-density I/O units.

From basic analog I/O to advanced temperature control

CJ1 offers a wide choice of analog input units, fit for any application, from low-speed, multi-channel temperature measurement to high-speed, high-accuracy data acquisition. Analog outputs can be used for accurate control or external indication.

Advanced units with built-in scaling, filtering and alarm functions reduce the need for complex PLC programming. High-accuracy process I/O units support an extensive range of sensors, for fast and accurate data acquisition. Temperature control units relieve the PLC CPU of PID calculations and alarm monitoring. These functions are handled autonomously by the unit, offering control performance and autotuning functions similar to stand-alone temperature controllers.

Add motion control to any CJ1 PLC

From simple position measurement to multi-axis synchronised motion control, CJ1 offers a full range of units:

- Counter Units gather position information from SSI- or incremental encoders. Actual positions are compared with internally stored target values.
- Position Control Units are used for point-to-point positioning with servo drives or stepper motors. Target data and acceleration/deceleration curves can be adjusted on-the-fly.
- Position- and Motion Control Units equipped with MECHATROLINK-II interface can control multiple drives through a single high-speed link. Message routing through multiple communication layers allows the attached drives to be configured from any point in the control network.

Open to any communication

CJ1 provides both standardised open networks interfaces, and cost-efficient high-speed proprietary network links. Datalinks between PLCs, or to higher-level information systems can be made using serial or Ethernet links, or the easy-to-use controller link network.

Omron supports the 2 major field networks, DeviceNet and PROFIBUS-DP. For high-speed field I/O, Omron's own CompoBus/S offers an unsurpassed ease of installation. Fully user-configurable serial and CAN-based communication can be used to emulate a variety of application-specific protocols.

Fast and powerful CPUs for any task

Omron's CS1-series CPUs are available in two processor speeds, each in various memory capacities. Besides the basic CPU models, versions are available for dual-redundant operation, supporting I/O hot-swapping. All CPUs have one dedicated board slot with a direct CPU-bus connection, in which a serial communication board or a loop control board can be mounted. All CPU units support IEC61131-3 structured text and ladder language.

Omron's extensive function block library helps to reduce your programming effort, while you can create your own function blocks to suit your specific needs.

Connection cable, D-Sub 9-pin PC serial port to PLC peripheral port	length: 6.0 m	CS1W-CN626
USB to serial conversion cable	—	CS1W-CIF31

Expand with up to 7 racks

CS1 systems can operate on 24 VDC power supply, or on 100-240 VAC mains. For small-scale systems with mainly digital I/O a low-cost small-capacity power supply can be used. For systems with many analog I/Os and control/communication units, it may be necessary to use a larger power supply unit.

PLC racks are available in several sizes, from 2 to 10 slots wide. Special backplanes are required for duplex systems. Depending on the CPU type, up to 7 expansions can be connected to the CPU rack, giving a total capacity of 80 I/O units. The total length of the expansion cables of one system may be up to 12 m.

Up to 96 I/O points per unit – input, output or mixed

Digital I/O units serve as the PLC's interface to achieve fast, reliable sequence control. A full range of units, from high-speed DC inputs to relay outputs, let you adapt CS1 to your needs.

CS1 units are available with various I/O densities and connection technologies. Up to 16 I/O points can be wired to units with detachable M3 screw terminals directly. High-density 32- and 64- point I/O units are equipped with standard 40-pin connectors. Prefabricated cables and wiring terminals are available for easy interfacing to high-density I/O units.

^{*1} C200H I/O units can also be mounted, except on CS1D systems.

Note: All Digital I/O units are designated as Basic I/O Units.

From basic analog I/O to process control

CS1 offers a wide choice of analog input units, fit for any application, from low-speed, multi-channel temperature measurement to high-speed, high-accuracy data acquisition. Analog outputs can be used for accurate control or external indication.

Advanced units with built-in scaling, filtering and alarm functions reduce the need for complex PLC programming. High-accuracy process I/O units support an extensive range of sensors, for fast and accurate data acquisition. All process and temperature I/O units provide isolation between all individual channels.

Note: All analog I/O units are designated as special I/O units

Add motion control to any CS1 PLC

From simple position measurement to multi-axis synchronised motion control, CS1 offers a full range of units:

- Counter Units gather position information from SSI- or incremental encoders. Actual positions are compared with internally stored target values.
- Position control units are used for point-to-point positioning with servo drives or stepper motors. Target data and acceleration/deceleration curves can be adjusted on-the-fly.
- Position- and motion control units equipped with MECHATROLINK-II interface can control multiple drives through a single high-speed link. Message routing through multiple communication layers allows the attached drives to be configured from any point in the control network.

Open to any communication, standard or user-defined

CS1 provides both standardised open networks interfaces, and cost-efficient high-speed proprietary network links. Datalinks between PLCs, or to higher-level information systems can be made using Serial or Ethernet links, or the easy-to-use Controller Link network.

Omron supports the 2 major field networks, DeviceNet and PROFIBUS-DP. For high-speed field I/O, Omron's own CompoBus/S offers an unsurpassed ease of installation. Fully user-configurable serial and CAN-based communication can be used to emulate a variety of application-specific protocols.

THE SMARTEST MODULAR I/O SYSTEM

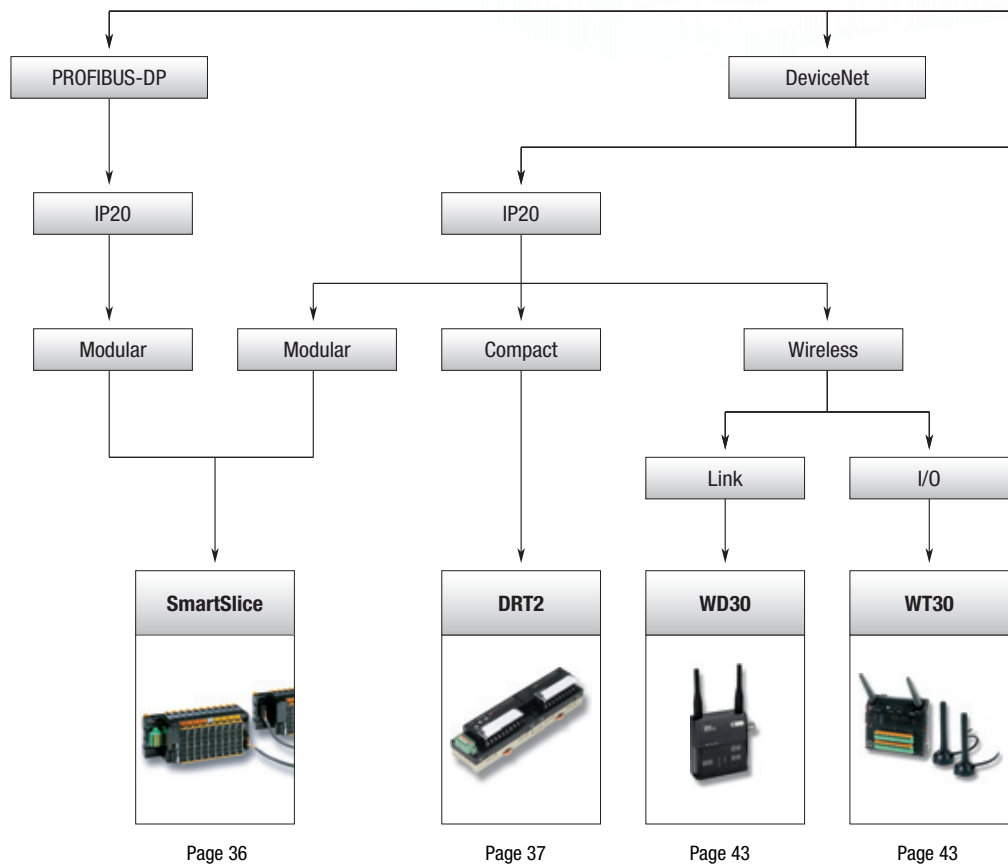

SmartSlice – Intelligence point by point

SmartSlice is the most advanced, yet easy-to-use remote I/O system currently available. Its built-in intelligence will help to reduce the effort you spend on engineering, troubleshooting and maintenance in your machine, line or plant. By keeping track of control performance and logging all operations, each module can provide timely warnings, preventing costly machine downtime.

- Reduce engineering time
- Reduce machine downtime
- Increase your efficiency

The five most used smart features are demonstrated at:
www.smartslice.info

The smartest modular I/O system

Omron's SmartSlice I/O system is compact, intelligent and easy. When used with Omron's CS1/CJ1 DeviceNet master units it is plug-and-work, no configuration tool is required. By using built-in functions such as pre-scaling, totalising, differentiation and alarming in analog I/O units, PLC programming can be minimised. Preventive maintenance data can be accessed using CX-Integrator software, standard PLC function blocks or NS-series Smart Active Parts.

- Most compact in the market (84 mm high)
- Easy set-up, backup and restore functions
- Diagnostics and preventive maintenance data at I/O level
- Detachable terminal blocks allow hot-swapping without re-wiring
- 3-wire connection with 'push-in' technology, no screwdriver required for installation

Smart DeviceNet I/O

Compact DeviceNet I/O units with extensive diagnostic functions. Data regarding power supply status, I/O response times, operation counters and on-time are continuously recorded and checked against user-defined limits. Any deviation is reported to the control system, as indication to perform machine maintenance and prevent unplanned downtime. Smart DeviceNet I/Os are supported by PLC Function Blocks and HMI Smart Active Parts, allowing program-less visualisation and monitoring from the CJ1 PLCs and NS operator terminals.

- Compact size IP20 housing
- Expandable digital I/Os
- Built-in diagnostics and preventive maintenance functions
- Detachable I/O terminal blocks
- Analog I/O with data pre-processing and alarm functions

8-point PNP output unit	24 VDC, 0.5 A per point	50x115x50	—	DRT2-OD08-1
16-point PNP output unit	24 VDC, 0.5 A per point	50x115x50	Expandable with one XWT unit	DRT2-OD16-1
16-point PNP output unit	24 VDC, 0.5 A per point	50x180x58	3-tier connection for direct actuator wiring	DRT2-OD16TA-1
16-point relay output unit	2 A per point, max. 8 A per common	50x125x52	with easy-to-replace relays, expandable with one XWT unit	DRT2-R0S16
8-point input + 8-point output unit (PNP)	24 VDC, input 6 mA, output 0.5 A per point	50x115x50	—	DRT2-MD16-1
8-point input + 8-point output unit (PNP)	24 VDC, input 6 mA, output 0.5 A per point	50x180x58	3-tier connection for direct sensor/actuator wiring	DRT2-MD16TA-1
4-Channel analog input unit	0 to 5 V, 1 to 5 V, 0 to 10 V, -10 to 10 V, 0 to 20 mA, 4 to 20 mA	50x115x50	Resolution 1/6000, conversion time 4 ms (4 inputs)	DRT2-AD04
4-Channel analog input unit	1 to 5 V, 1 to 5 V, 0 to 10 V, -10 to 10 V, 0 to 20 mA, 4 to 20 mA	50x115x50	Resolution 1/30000, conversion time 250 ms (4 inputs)	DRT2-AD04H
2-Channel analog output unit	0 to 5 V, 1 to 5 V, 0 to 10 V, -10 to 10 V, 0 to 20 mA, 4 to 20 mA	50x115x50	Resolution 1/6000, conversion time 2 ms (2 outputs)	DRT2-DA02
2-Channel temperature input unit	Platinum Resistance Thermometer types Pt100, JPt100	50x115x50	0.3% accuracy, conversion time 250 ms (4 inputs)	DRT2-TS04P
2-Channel temperature input unit	Thermocouple types R, S, K, J, T, B, L, E, U, N, W, and PL2	50x115x50	0.3% accuracy, conversion time 250 ms (4 inputs)	DRT2-TS04T
8-point PNP input expansion unit	24 VDC, 6 mA per point	50x66x50	Expansion unit for DRT2 and CRT1 series	XWT-ID08-1
16-point PNP input expansion unit	24 VDC, 6 mA per point	50x94x50	Expansion unit for DRT2 and CRT1 series	XWT-ID16-1
8-point PNP output expansion unit	24 VDC, 0.5 A per point	50x66x50	Expansion unit for DRT2 and CRT1 series	XWT-OD08-1
16-point PNP output expansion unit	24 VDC, 0.5 A per point	50x94x50	Expansion unit for DRT2 and CRT1 series	XWT-OD16-1

Note: To order models with NPN (sinking) outputs and corresponding inputs (+V common), omit the "-1" from the model code.

Accessories

Type	Order code
Power supply tap with 2 fuses, 2 bus connectors and termination resistor	DCN1-1P
T-branch tap with 3 bus connectors (screw clamp) and terminating resistor	DCN1-1C
T-branch tap with 3 bus connectors (screwless)	DCN1-1NC
T-branch tap with 5 bus connectors (screw clamp) and terminating resistor	DCN1-3C
T-branch tap with 5 bus connectors (screwless)	DCN1-3NC
Terminating resistor with screw terminals	DRS1-T

Smart CompoNet I/O

Combining the smart features of DRT2 DeviceNet I/O and the speed and ease of use of CompoBus/S, CompoNet is ideal for high-speed machine control with a flexible and expandable architecture. The special flat cable and IDC connectors make installation quick and easy. The use of repeaters allows wide-area networks with free topology, ideal for conveyor- and warehouse automation.

- Compact size IP20 housing
- Expandable digital I/Os with detachable terminal blocks
- Easy network wiring with IDC connections
- Built-in diagnostics and preventive maintenance functions
- Analog I/O with data pre-processing and alarm functions

Accessories

Unit type	Specifications	Size in mm (HxWxD)	Remarks	Order code
CompoNet Repeater Unit	1 upstream port + 1 downstream port	50x95x43	For extending CompoNet trunk lines, or creating branch lines	CRS1-RPT01
CompoNet 4-wire flat cable	For IP20 use	100 m	For power supply + communication, use with DCN4-connectors	DCA4-4F10
CompoNet Branch connector for trunk line	For IP20 use	—	To create a branching point on a trunk line	DCN4-TR4
CompoNet Branch line end connector	For IP20 use	—	To connect a branch line to a trunk line	DCN4-BR4
CompoNet Y-connector	For IP20 use	—	To connect two line connectors to one slave unit	DCN4-MD4
CompoNet Screw terminal connector	For IP20 use	—	To provide conventional screw terminals for masters or slaves	DCN4-TB4
CompoNet Terminator	For IP20 use	—	Plugs in to DCN4-MD4 or DCN4-TR4	DCN4-TM4
CompoNet connector tool	For DCN4-connectors	—	To attach DCN4-connectors to DCA4-4F10 flat cable	DWT-A01

Fast and easy over CompoBus/S

Omron's unique CompoBus/S is the original I/O bus for machine automation. With free topology and up to 500 m bus length in long-distance mode, it can be used as a remote I/O system. In high-speed mode (100 m max.) the guaranteed sub-milli-second cycle time makes it ideal for efficient machine control. Used with the compact CPM2C-S PLC as master, your machine control system will fit in the smallest spaces.

- Compact size in IP20 housing
- Fast cycle time; less than 1 ms per 256 I/O points
- Easy set-up; no software required
- Choice of 4- 8- and 16-point Digital I/O; transistor-, and relay models
- Analog In/Outputs and customisable modules available

CompoBus/S termination block (screw connection)	SRS1-T

IP67 DeviceNet I/O

Rugged I/O units for field mounting. The DRT2 slave units feature internal diagnostic and maintenance data collection, which can be accessed over the network. Power supply status, I/O response times, operation counters and on-time monitor data is available at all times, and is internally checked against user-defined limits. Maintenance warnings will be generated when limits are exceeded. Using CX-One or NS-series HMI with Smart Active Parts for visualisation, this allows more efficient system setup, commissioning and troubleshooting without any additional programming.

- IP67 protection, DRT2 versions are also oil- and welding-spatter proof
- Internal circuits powered by DeviceNet; fewer connections means less installation errors
- Smart Slave functions for diagnostics and preventive maintenance
- Indication of broken wire and short-circuit in I/O signals
- M12 connectors for fast installation

IP54 CompoNet I/O – The alternative solution for field-mounted I/O

IP67 I/O offers a high degree of protection, but requires costly connection technology. CompoNet IP54 I/O offers an alternative with standard I/O connections, easy communication wiring with IDC connectors, all in a dust-proof and splash-resistant case. High-speed communication and flexible topology make it ideal for finely distributed control.

- IP54 protection, dust-proof and splash water resistant
- Internal circuits powered by CompoNet; fewer connections means less installation errors
- Smart Slave functions for diagnostics and preventive maintenance
- Indication of broken wire and short-circuit in I/O signals
- Sensor connectors or push-in screwless terminals for fast installation

2-point PNP input unit	24 VDC, 6 mA per point	95x50x51	e-CON sensor connectors, power supply via CompoNet cable (50 cm attached)	CRT1B-ID02SP-1
4-point PNP input unit	24 VDC, 6 mA per point	95x50x51	e-CON sensor connectors, power supply via CompoNet cable (50 cm attached)	CRT1B-ID04SP-1
2-point PNP output unit	24 VDC, 0.2 A per point	95x50x51	e-CON sensor connectors, power supply via CompoNet cable (50 cm attached)	CRT1B-OD02SP-1
2-point input + 2-point PNP output unit	24 VDC, 6 mA per point (input), 0.2 A per point (Output)	95x50x51	Screwless push-in connectors, power supply via CompoNet cable (50 cm attached)	CRT1B-MD04SLP-1

Note: To order models with NPN (sinking) outputs and corresponding inputs (+V common), omit the "-1" from the model code.

Accessories

Unit type	Specifications	Size in mm (HxWxD)	Remarks	Order code
CompoNet Repeater Unit	1 upstream port + 1 downstream port	50x95x43	For extending CompoNet trunk lines, or creating branch lines	CRS1-RPT01
CompoNet 4-wire flat cable	For IP54 use	100 m	For power supply + communication, use with DCN5-connectors	DCA5-4F10
CompoNet Branch connector for trunk line	For IP54 use	–	To create a branching point on a trunk line	DCN5-TR4
CompoNet Branch line end connector	For IP54 use	–	To connect a branch line to a trunk line	DCN5-BR4
CompoNet Terminator	For IP54 use	–	Plugs in to DCN5-TR4	DCN5-TM4
CompoNet connector tool	For DCN5-connectors	–	To attach DCN5-connectors to DCA5-4F10 flat cable	DWT-A02

IP67 CompoBus/S

Rugged I/O units for field mounting. Omron's unique CompoBus/S is the most efficient I/O bus for machine automation. With free topology and up to 500 m bus length in long-distance mode, it can be used as a remote I/O system. In high-speed mode (100 m max.) the guaranteed sub-millisecond cycle time makes it ideal for efficient machine control. With IP67 slave modules distributed throughout the machine, the need for protective enclosures is minimised.

- IP67 protection against dust and water
- Fast cycle time; less than 1 ms for 256 I/O points
- Easy setup; no software required
- Choice of 4- and 8-point Digital I/O
- M12 connectors for easy field wiring

IP67 cap for M12 sockets	Metal cap for unused I/O connections	—	XS2Z-12

Wireless DeviceNet communication

There are applications where a normal wired connection is not practical, impossible to maintain or prone to disturbance. WD30 provides a wireless master-slave data link for up to 63 DeviceNet sub-networks. Alternatively, a WD30 master unit can directly control WT30 wireless I/O slave units. For direct access to wireless remote I/O without passing through DeviceNet, the WT30 master is equipped with a serial CompoWay/F interface.

- Easy to set-up: Extensive diagnostic features such as signal strength measurement and channel usage
- Each Wireless master handles up to 100/100 words, input/output data. Up to 63 Wireless Slaves per Wireless Master
- Uses spread spectrum technology for superior noise resistance in manufacturing environments
- Relay function for extension of communication range (3 repeaters max.)
- Explicit message communication

THE RELIABLE INDUSTRIAL DIALOGUE

DyaloX – The reliable choice

The DyaloX Industrial PC is designed to provide exceptional performance, operating round-the-clock throughout its lifetime. It offers self-diagnostic hardware and software, such as the Omron RAS solution, to ensure that DyaloX IPCs will keep on running long after other IPCs have given up. Packaged with our HMI software, CX-Supervisor, it is the ultimate PC based HMI solution.

- Self-diagnostic system as early warning system to avoid machine downtime
- Fan-less, HDD-less (2 GB disk-on-module storage, CF for storage expansion)
- 3 year warranty, 5 year minimum delivery, 7 year courier repair service

Industrial PC created for 24/7 operation in the most demanding industrial environments

The DyaloX Industrial PC is designed to provide exceptional performance operating round-the-clock throughout its lifetime. Drawing on our many years' experience in industrial-class standalone PC-based equipment, we have created unique self-diagnostic hardware and software, such as the Omron RAS solution, to ensure that DyaloX IPCs will keep on running long after other IPCs have given up.

- Omron RAS solution
- Industrial-grade 1.3 GHz Intel Celeron CPU
- 2 GB Disk_On_Module storage, CF interface for extended storage
- Fan-less heat sink cooling for enhanced reliability
- 3 year warranty, 5 year minimum delivery, 7 year courier repair service

NSA-CPU

Item		NSA1 _TX01 _E	NSA-CPU01-E	NSA-CPU02-E	NSA-CPU03-E	NSA-CPU04-E
OS		Preinstalled Windows XP embedded				
Processor		1.3 GHz Intel Celeron-M Processor				
Storage device	Type	DiskOnModule (Flash memory)				
	Capacity	2 GB	2 GB	4 GB	2 GB	4 GB
	Service life (write cycles)	-	NAND flash memory: 100,000 write cycles (to the same block)**1			
Memory	Main memory	512 MB DDR-SDRAM (non-ECC)			1GB DDR-SDRAM (non-ECC)	
	Cache memory	512 KB Level 2 cache memory (built into the CPU)				
Interface	Keyboard	PS/2 keyboard with 6-pin MINI DIN connector				
	Mouse	PS/2 mouse with MINI DIN connector				
	Serial ports	-	2 ports conforming to EIA RS-232C for 9-pin D-SUB male connectors			
	Ethernet	One 10 BASE-T/100 BASE-TX port for an RJ45 connector				
	USB ports	2 USB 2.0/1.1 ports for USB type-A connectors		2 USB 2.0/1.1 ports for USB type-A connectors 2 USB 1.1 for USB type-A connectors		
	Memory Card	1 CF Card slot				
	Video output	-	1 DVI port for DVI-I connector			
	Audio	-	Line-In/Line-Out/Mic-In for mini jack			
	Expansion slots	PCI expansion bus, 2 slots				
Special RAS board	External input port	3-pin connector port for the UPS power interruption signal				
	Status LEDIndicators	4 (RUN/BATLOW/ERR/DIAG)				

Item		NSA1_-TX01_-E	NSA-CPU01-E	NSA-CPU02-E	NSA-CPU03-E	NSA-CPU04-E
RAS functions	Special RAS board functions	Alive connection monitoring, device restart, timer start, startup and shutdown monitoring, backlight lit time measurement, UPS power interrupt signal output, and logging functions	Alive monitoring, start and shutdown monitoring, shutdown/re-boot, UPS power monitoring, timer start, motherboard monitoring, logging function			
	Motherboard RAS functions	Standard PC RAS info, post error logging, post error retry, CMOS data recovery				
POWER LED indicator		Yes (green)				
Service life		50,000 hours at 40°C	50,000 hours at 30°C			
Battery life	Main board	5 years at 25°C (NSA-BAT01)				
	RAS board	5 years at 25°C (NSA-BAT02)				

*1 Calculate condition
 Free area: 500 MB (*excluding OS&Application)
 Overwrite data size/time: 0.5 MB/time
 Overwrite times/day: 10,000 times/day
 MTBF: (500 MB *100,000 times) / (0.5 MB *10,000 times/day) = 10,000 days = 27 years

NSA-TX/TY

Item		NSA1_-TX01_-E	NSA-TX151	NSA-TY171
Display panel	Type	TFT color LCD		
	Size	12.1 or 15 inches	15.0 inches	17.0 inches
	Resolution	1024×768 dots		1280×1024 dots
	Contrast	300 cd/m ² (typical)	270 cd/m ² (typical)	200 cd/m ² (typical)
	Viewing angle	130° left to right, 90° up and down		
	Colors displayed	262,144		
Backlight	Type	2 CCFL		4 CCFL
	Contrast adjustment	Three-level software adjustment ^{*1}	10 level adjustment by rotary switch	
	Backlight not lit detection	The software reads the lamp burnout detection signal from the inverter ^{*2}	-	-
	Service life	50,000 hours min. ^{*3}		
Touch panel	Type	Analog resistive type		
	Effective input area	12 inches: 185.5×247	229×305	272×340
	Size in mm (H×W)	15 inches: 229×305		
	Operating service life	10,000,000 operations (with non-stop key stroking using fingers to input) 100,000 characters (with non-stop character entry using a stylus to input)		
Interface	USB ports	2 USB 2.0/1.1 ports for USB type-A connectors	3 USB1.1 ports for USB type-A connectors (2 on front side) 1 USB1.1 port (for upstream) for USB type-B connector	
	Video Input	-	1 DVI for DVI-D connector	
POWER LED indicator		Yes (green)		
Service life		50,000 hours at 40°C ^{*4}	50,000 hours at 30°C	

*¹ The contrast cannot be adjusted significantly.
 *² It is not the service life, but rather lamp failure due to hardware problems such as a broken wire that is detected. Backlight not lit detection means both backlight lamps have burnt out.
 *³ The service life is a guideline for maximum contrast at room temperature with normal humidity and is provided strictly for reference. It varies significantly with the ambient temperature. The service life will be shorter under extreme (high or low) temperature conditions and falls off sharply particularly under low-temperature conditions.
 *⁴ The service life is a guideline that is provided strictly for reference. It varies with factors such as the installation location and operating conditions.

General specifications

Item	NSA1 _TX01_-E	NSA-CPU	NSA-TX151	NSA-TY171
Rated supply voltage	24 VDC			
Allowable supply voltage range	24 VDC, 20.0 VDC to 27.6 VDC (24 VDC ±15%)			
Power consumption	12 inches: 80 W max. 15 inches: 100_W max.	60 W max.	40 W max.	55 W max.
Ambient operating temperature	0 to 50°C ^{*1}			
Ambient storage temperature	-10 to 55°C ^{*1}	-10 to 60°C	-10 to 60°C	
Ambient operating humidity	10% to 80% with no condensation ^{*1}			
Ambient storage humidity	10% to 85% with no condensation ^{*1}			
Operating atmosphere	Must be free of corrosive gases. Must be fairly dust free.			
Noise resistance	Conforms to IEC6100-4-4, power supply line: 2 kV			
Vibration resistance (in operation)	Conforms to JIS C0041, 0.05 mm amplitude at 10 to 55 Hz for 50 min. Each in the X, Y, and Z directions			
Shock resistance (in operation)	Conforms to JIS C0041, 196 m/s ² three times each in the X, Y, and Z directions			
Degree of protection	Front panel: IP65 or the equivalent (display side only) ^{*1}	—	IP65F (front panel oil protection) ^{*1}	
Weight	12 inches: 5 kg max. 15 inches: 7 kg max.	4 kg max.	6 kg max.	7 kg max.
Dimensions in mm (HxWxD)	12 inches: 264×322×100 15 inches: 312×384×108	233x308x76.5	328x404x57	371x436x57

System configuration

(Picture represents backside of a SYSMAC One unit)

HMI with integrated PLC and Network interface

The NSJ12 and NSJ10 are combined with a CJ1G-CPU 45H and a DeviceNet or PROFIBUS interface fitted into a compact housing occupying less panel space than the separate products. Programming can be done via the standard high-speed USB port. The SYSMAC One is completely transparent, so the PLC, network (including field devices) and HMI can be accessed via a single port. A great advantage when servicing your machine remotely.

- HMI + PLC with 2 separate CPUs for greater performance and reliability
- Transparent architecture for easy remote maintenance
- Compact design occupying less panel space
- Flexible and cost-effective solution with multiple screen sizes, CPUs & networks
- Smart Active Parts for graphical interaction to field devices

Panel output dimensions		302 ⁺¹ ₀ ×228 ⁺¹ ₀ mm (W×H) Panel thickness: 1.6 to 4.8	
Grounding		100 Ω or less	
Weight		2.7 kg max.	2.5 kg max.
Degree of protection		Front operating panel: Equivalent to IP65F and NEMA4 ^{*3}	

Item	NSJ12-TS0 _G5D	NSJ10-TV0 _G5D
Battery life	5 years (at 25°C) The SRAM and RTC will be backed up for 5 days after the battery runs low (i.e., after the indicator lights orange). The SRAM and RTC will be backed up by a super capacitor for 5 minutes after removing the old battery (i.e., after turning ON power after 5 minutes).	
International standards	Conforms to cULus and EC Directives.	

*1 A delay circuit that charges a capacitor is used to limit the inrush current. If a hot start is performed when the power supply has been OFF only a short period of time, the capacitor will still be charged and the inrush current specified above will be exceeded by up to approximately five times the specified value. When selecting fuses or breakers for external circuits, allow sufficient margin in the melting temperatures, detection characteristics, and inrush current.

*2 Display angles off horizontal are as follows:

*3 May not be applicable in locations with long-term exposure to oil.

HMI with integrated PLC and Network interface

The NSJ8 and NSJ5 are combined either with a CJ1G-CPU 45H or with a low-cost CJ1M-CPU13 PLC and a DeviceNet or PROFIBUS interface. It is fitted into a compact housing occupying less panel space than the separate products. Programming can be done via the standard high-speed USB port. The SYSMAC One is completely transparent, so the PLC, network (including field devices) and HMI can be accessed via a single port. A great advantage when servicing your machine remotely.

- HMI + PLC with 2 separate CPUs for greater performance and reliability
- Transparent architecture for easy remote maintenance
- Compact design taking up less panel space
- Flexible and cost effective solution with multiple screen sizes, CPUs & networks
- Smart Active Parts for graphical interaction to field devices

Item	NSJ8-TV0_-G5D NSJ8-TV0_-M3D	NSJ5-TQ0_-G5D NSJ5-SQ0_-G5D NSJ5-TQ0_-M3D NSJ5-SQ0_-M3D
Supply voltage	24 VDC	
Allowable supply voltage range	20.4 to 27.6 VDC (24 VDC ±15%)	
Power consumption	30 W max.	SQ0_: 21 W max. TQ0_: 22 W max.
Current consumption	Controller Section Internal 5 V: 500 mA max. DeviceNet Section Internal 5 V: 200 mA max., External 24 V: 18 mA max.	
Inrush current *1	At 24 VAC: 10 A/20 ms max. for cold start at room temperature	
Ambient operating temperature (depending on angle of display surface off horizontal) *2	90° to 60°: 0 to 50°C 60° to 30°: 0 to 45°C 30° to 0°: Use prohibited	90° to 30°: 0 to 50°C 30° to 0°: 0 to 40°C
Ambient storage temperature	-20 to 60°C	
Ambient operating humidity	0 to 40°C: 35% to 85% (with no condensation) 40 to 50°C: 35% to 60% (with no condensation)	
Ambient operating environment	No corrosive gases	
Insulation resistance	20 MΩ min. (at 100 VDC) between DC external and GR terminals	
Dielectric strength	800 VDC for 1 min between DC external and GR terminals, leakage current: 10 mA max.	
Noise immunity	2 kV on power supply line (conforming to IEC 61000-4-4)	
Vibration resistance (during operation)	10 to 57 Hz, 0.075-mm amplitude, 57 to 150 Hz, acceleration: 9.8 m/s ² in X, Y and Z directions for 80 minutes	
Shock resistance (during operation)	147 m/s ² , 3 times each in X, Y and Z directions	
External dimensions in mm (W×H×D)	Without Expansion Unit	232×177×73.3
	With Expansion Unit	232×177×89.3
Panel output dimensions	220.5 ^{+0.50} ₀ ×165.5 ^{+0.50} ₀ mm (W×H) Panel thickness: 1.6 to 4.8	184 ^{+0.50} ₀ ×131 ^{+0.50} ₀ mm (W×H) Panel thickness: 1.6 to 4.8
Grounding	100 Ω or less	
Weight	2.0 kg max.	1.1 kg max.
Degree of protection	Front operating panel: Equivalent to IP65F and NEMA4*3	
Battery life	5 years (at 25°C) The SRAM and RTC will be backed up for 5 days after the battery runs low (i.e., after the indicator lights orange). The SRAM and RTC will be backed up by a super capacitor for 5 minutes after removing the old battery (i.e., after turning ON power after 5 minutes).	
International standards	Conforms to cULus and EC Directives.	

*1 A delay circuit that charges a capacitor is used to limit the inrush current. If a hot start is performed when the power supply has been OFF only a short period of time, the capacitor will still be charged and the inrush current specified above will be exceeded by up to approximately five times the specified value. When selecting fuses or breakers for external circuits, allow sufficient margin in the melting temperatures, detection characteristics, and inrush current.

12"/10"/8" TFT screen

These models offer 256 colours (32,768 for image data), two USB connections for downloading or printing and optional Ethernet, Controller Link and Video board connections. One great advantage with the NS is that you can make use of Omron unique Smart Active Parts (SAP) that save you time when configuring, commissioning and maintaining your machine. SAP are pre-programmed, pre-tested visualisation objects with embedded communication code, bringing 'drag and drop' simplicity to HMI design.

- Perfect clarity and fast switching screens
- Extremely long backlight life (up to 50,000 hours)
- Support all European languages, Asian and Cyrillic
- Easy data logging on compact flash
- Large Memory size (60 MB)
- Support for several non-Omron PLC's

5.7" screen in colour and monochrome

This series consists of Monochrome models with 16 grey scales and STN/TFT models with up to 32,768 colours. It is equipped with a USB connection for project download/upload and the possibility to communicate over Ethernet. One great advantage with the NS is that you can make use of Omron unique Smart Active Parts (SAP) that save you time when configuring, commissioning and maintaining your machine. SAP are pre-programmed, pre-tested visualisation objects with embedded communication code, bringing 'drag and drop' simplicity to HMI design.

- Perfect clarity and fast switching screens
- Extremely long backlight life (up to 75,000 hours)
- Support all European languages, Asian and Cyrillic
- Easy data logging on compact flash
- Large Memory size (20 MB)
- Support for several non-Omron PLC's

Enclosure rating	Front panel: Equivalent to IP65F (NEMA4) ^{*4}		

^{*1} The operating temperature is subject to the following restrictions, depending on the mounting angle and whether an Expansion Unit is installed or not.
Without any Expansion Unit Installed: Mounting angle of 0° to 90° less to the horizontal: Operating temperature range of 0 to 50°C

*2 Operate the PT within the temperature and humidity ranges shown in the following diagram.

*3 When a STN LCD display device is used (NS5-SQ-V1/-V2 or NS5-MQ-V2), the display quality will decline (e.g., the contrast ratio will be reduced) if the temperature exceeds 40°C. Also, when the temperature drops, the response speed is lowered due to characteristics of liquid crystals.

*4 May not be applicable in locations with long-term exposure to oil.

NS5 Handheld, suited for use in harsh conditions

The NS series has evolved into a mobile format. Based on the standard 5.7" STN colour version, we can offer a handheld version of the NS series. Offering 10 Function keys for most used functions and with a protection degree of IP65 it is the product to use in harsh environment where freedom of movement is needed.

- 10 Function keys, 4 hardwired for inching
- Emergency switch on front plus enable switch on back of unit
- Well protected against water, IP65
- Compact Flash, Serial and USB interface

Proven technology with outstanding reliability

The NT21 is a cost effective product that offers features like two serial ports and blue mode for the LCD.

- Large screen capacity (max. 3999)
- Two serial ports, connect two devices at the same time
- Screen emulation of the PLC programming console
- Alarm/recipe function
- Import of I/O points from CX-Programmer

The cost effective face lift

The NT3S is a very affordable touch screen that helps you upgrade your machine to a modern human machine interface. The small NT3S offers features such as multi-language and two serial ports with multi-protocol functionality.

- RS422/485 port available, no need for a converter
- Multi language, use up to 9 languages in a project
- Alarm/Recipe function
- Connect to most third party PLCs and inverters
- Easy and free programming software

		RS-232/CMOS/485/422 on one port, RS232/CMOS on second port, No RTC	NT3S-ST124B-E
		RS-232/CMOS/485/422 on one port, RS232/CMOS on second port, with RTC	NT3S-ST123B-E
		RS-232/CMOS/485/422 on both ports with RTC	NT3S-ST121B-E

Accessories

Type	Description	Order code
NT2S-SF121/125 and NT3S	peripheral port CPM series except CPM2C, 2 m	NT2S-CN212-V1
NT2S-SF121/125 and NT3S	peripheral port CPM series except CPM2C, 5 m	NT2S-CN215-V1
NT2S-SF121/125 and NT3S	mini-peripheral port CJ1/CS1 and CPM2C series, 2 m	NT2S-CN223-V2
NT2S-SF121/125 and NT3S	serial port C-series PLC, 2 m	NT2S-CN232-V1
NT2S-SF121/125 and NT3S	serial port C-series PLC, 5 m	NT2S-CN235-V1
All NT2S and NT3S models	serial programming cable, 2 m	NT2S-CN002

Software

Type	Order code
This software is provided free of charge and features Windows fonts, a Multi language import/export utility, a character map to design your own characters and can be used to place bitmaps in your application.	NTXS

Specifications

Size in mm (HxWxD)	77x140x35
Effective display area	98x35 mm (192 x 64 pixels, 4.1 inch)
Type with ethernet	24 VDC \pm 15%
Function keys	—
Touch panel	Analog Resistive
Obtained standards	CE, cULus
Display graphics	Rectangle, rounded rectangle, circle, oval, line, bitmaps
No. of display characters (standard characters)	32 characters x 8 lines
No. of registered screens	65,000 max. (limited by memory capacity)
Screen data capacity (standard)	120 KB
Expansion memory	—
Memory card interface	—
Expansion interface	—
Ethernet	—
Internal memory	1 kWords data, 1 kWords retentative, 64 words system memory
Ladder monitor	—
Programming Console function	—
Device monitor	—
Barcode reader connection	—
Printer connection	Supported
Multi-Vendor support	Supported for several non-Omron PLCs ^{*1}
Backlight life	LED, min. 50,000 hours

^{*1} Please contact Omron for a list of available drivers.

HMI with four text lines and 22 F-keys

The NT11 is a Function key HMI with four text lines that can each hold up to 20 characters. It has a parallel printer connection next to a serial port for connection to a PLC. It has a LED backlight that has a life expectancy of at least 50,000 hours.

- Easy programming software.
- Small size and installation depth.
- Customisable F-Keys
- Printer connection.
- Cost effective solution.

HMI with two text lines, 6 or 20 F-keys and up to two serial ports

The NT2S is the smallest HMI that we can offer you. It is based on a 16 × 2 lines LCD display with 6 or 20 Function keys. It offers IP65 protection, an optional RTC and printer connection.

- Easy and free programming software.
- Small size and installation depth.
- Real Time Clock (depending on model).
- Printer connection (depending on model).
- Cost effective solution.
